To: ham-digital@ucsd.edu

I have gotten a few negative and a few positive comments back on
the DRSI DPK-9600 baud TNC. What TNC or TNC/modem combination
seems to give best performance? The TNC should be able to run
in either native AX.25 mode or in KISS mode for use with TCP/IP
over packet, the later preferred.

Any and all feedback on 9600bd TNCs will be GREATLY appreciated.

Thanks & 73,
Mike KB4LFH

To: ham-digital@ucsd.edu

Is there a program for SSTV and FAX, like JVFX, for Macintosh computers ?
I am grateful for all responses !

Hi All,

Can anyone tell me where I can get a description of the format of
the KISS protocol ? Any info. at all would be of interest...

Thanks in advance ...

I'm trying to install net package (ka9q internet protocol package) under
Linux, with my pk232 us model, and I have always problems : missing files,

manuals to short...etc...

I never arrived to send a ping frame to another station !

Is there someone who use net (or something better ?) under Linux with a
pk232 who can send me his config files (like startup.net) ?

Thanks in advance...
(sorry but english is not my native language)
